

CHAPTER V

CLOSING

5.1 Conclusions

Basically, Internship program is an opportunity for students to be able to apply the knowledges and the abilities that has been gained and learned while learning in college. Nowadays, with the existences of this program and activity, students will know directly their purpose and learn to be more discipline both in terms of time and other matters, and they will get used to think critically while in under pressure situation and be responsible for the assignment's authority that was given to them. It aims for the students to open wider their direction or their mind patterns in resolving some daily challenges they have met both in work environment and in social community. In addition, i also gained some new experiences and increased my knowledge on work environment and the scope of work that i took. I also get the opportunity to see a direct cooperation and social relations between staffs and the Head of Center for Policy Analysis and Development for Asia-Pacific and Africa Region (P3K2 Aspasaf).

Furthermore, this Internship activity has also built my confidence to be more mature when it comes to solve some problems, practice and perfect my language patterns to be more polite and structured. Introduction of these work and social environment also made me be more compliant with the rules of the procedures that exist in their regulations and be more careful with all actions that could cause damage to the assessment.

5.2 Suggestions

After experiencing two months of Internship program at Center for Policy Analysis and Development for Asia-Pacific and Africa (P3K2 Aspasaf), i realize that there are several things that could help and hinder the sustainability of activities during the internship program when its running. Therefore, i would like to give some suggestions that might be able to solve the obstacles from our Internship Programs or activities and later anyone can proceed it well, the suggestions are as follows:

1. Try to obey the rules of the procedures and always maintain a good reputation of your college;
2. Choosing the right division or unit which is relevant to your interests, knowledges and abilities;
3. Take advantage of the opportunity in this Internship program to add more experiences, informations and knowledges;
4. Students should prepare things that would be needed if they were able to set a schedule when it comes to finish an assignment and Internship program both together properly.

Finally, thus are the suggestions i could convey, and hopefully this internship report can be useful for students who will experience Internship in the future. Thank you.
