

## CHAPTER 5

### CONCLUCION

After examining the result analysis of *Time For Love* Novel by Debby Macomber the subject of characters Elizabeth wainwright which are the reflection of curiosity and possess concepts, can be concluded several things, as follows: The writer conclude that an intrinsic approach could be used to analyze time for love the writer apply the showing method to find out the characters' characterization. The characters I analyze are Elizabeth and Andrew, using five functional settings, The writer completely know the setting of the novel can support the research theme as well. And last, by using the concept of a plot, I discover a novel plot through exposition to resolution.

It is because after the writer analyze the novel, the main character, Elizabeth Wainwright, shows her Curiosity and Possess toward Andrew desire to have his Love Elizabeth think because she thought that Andrew was a kind person and cared for her. Therefore, Andrew still keep a Secret toward her that he actually a Bodyguard hiring by Elizabeth father, she always care about Andrew, Elizabeth always prepared what Andrew needed. As in chapter four analysis about Elizabeth Curiosity and Possess, she becomes like that because she think Andrew is her material Husband, and Elizabeth shows everything to shows how much s he love Andrew. In this research is if you like someone show your feeling without any wrong perspective and just honest to each other to create trust to each other. But we must also have to think in positive ways. We also shouldn't expect anything from others, because everyone can't do the same for us. Don't be too fascinated with someone

Because we can't see someone from the way they talk because sometimes someone can lie. Then if we have done something good to someone else and that other person is doing evil to us, there is no need for curiosity and want to know all the everything matters just love unconditionasly. According to this research, it is

potential for the next research to analyze Time For novel through other approaches or concept. This research also can introduce the student of English Language and Culture Studies about curiosity, Possess in literary work. This research also can use as a comparison to write a better analysis. As humans we must ever feel curiosity feeling. Human curiosity is not limited to the human condition itself or the circumstances surrounding it, to all things that exist in this world even to things that do not make sense. Humans try to find answers to those questions and they are also trying gaining knowledge of what he or she questions from a curious urge. This feeling can also cause the people to experience curiosity. This case, illustrates in this novel. Curiosity in every people is very important. Humans are always curious in what it really is (know what), how things happen (know how), and why so (know why) of all things.

This research can give us something that we can learn in our lives. Both for children and adults, curiosity also has benefits related to psychological, emotional, social, and even health. If you have a curiosity about something, look for that answer until you get it and be satisfied. Curiosity is associated with an increase in positive emotions, decreased levels of anxiety, possess more life satisfaction, and improved psychological well-being.
