0.950

Notes: leave cell empty for default value, in a test with a T ratio, generally the hypothesis is supported if T ratio > critical T ratio, one-tailed tests are used for directional hypotheses; in a test with a confidence interval, generally the hypothesis is supported if zero is not in the interval.

Critical T ratios  
For one-tailed tests: 1.645.  
For two-tailed tests: 1.960.
