

CHAPTER 5

CONCLUSION

After analyzing of *The Stars We Steal* novel by Alexa Donne the subject of the character Princess Leonie Kolburg which are the reflection of love and conflict concept, can be concluded several things, as follows: I conclude that an intrinsic approach could be used to analyze *The Stars We Steal* by Alexa Donne, I apply the showing method to find out the characterization of the characters. The characters that I analyze are Princess Leonie, Elliot, and Freda Lind using five functional settings, I completely know the setting of the novel can support the research theme as well. And last, by using the concept of a plot, I discover a novel plot through exposition to resolution.

It is because after I analyze the novel, the main character, Princess Leonie Kolburg shows her love and conflict because when Princess Leonie Kolburg reunites with her ex-fiance Elliot, who has been gone for three years. Elliot has a lot of changes, he is now more often charmed by girls. Even her own sister Carina is seduced by Elliot. Then her cousin Klara ends up liking Elliot too. Back when Princess Leonie Kolburg was still with Elliot, Elliot was still a good man and smiling. But now he looks more indifferent, mysterious and does not care about the surroundings. Now Elliot even hates her just because back then when he was invited to sail with, Princess Leonie Kolburg refused his invitation due to his father's prohibition to be close to the poor. Even now Elliot has turned into a rich and handsome man. But still, Princess Leonie Kolburg in Elliot's eyes is just a girl who only wants money. Even though it is not true. During this time Princess Leonie Kolburg was required by his father to immediately get a rich husband, so that she could help the kingdom which was on the verge of collapse.

According to this research, it is potential for the next research to analyze *The Stars We Steal* by Alexa Donne through other approaches or concept. This research can also introduce the student of English Language and Culture Studies about Love and Conflict in literary work. This research can also use as a comparison to write a better

analysis. As humans we also have must have love, even though the people we love hate us, we must still have love in our hearts. It does not matter if the people we love us back or not. What is clear is that if we love, we are happy, then do it. Humans are trying to find answers to these questions and they are also trying to gain knowledge about what they are asking from a feeling itself. These feelings can also because people want to have someone.
