### **Rhetoric**

Rhetoric is how the language style used in the text. The elements of the rhetoric is graphic. In this speech, BTS don’t use any graphic, so there is no analysis in rhetoric.

## **CHAPTER 5 CONCLUSION**

In this final chapter, I summarized the results in this research. In this research, I found several hidden meaning in BTS speech that relates to 2020 graduates. There are a lot of problem that the 2020 graduates that have been through and all the struggles that they have to face in the future. BTS share the experience about all the struggles that they have suffered from and gives a lot of advice to the 2020 graduates. Actually, all the advice is not only for the 2020 graduates, but all of us could relate to that advice. In the speech, I found 7 hidden meaning that BTS mention in the speech. For the language and ideology, I use a different theory. In analysing the language, I use figurative language that uses figures of speech. Figurative is related with meaning. Figurative language has 11 types which are metaphor, simile, personification, apostrophe, hyperbole, litotes, metonymy, synecdoche, transferred epithet, paradox, and pun. But in my research, I only used several types of figurative language. The most of the familiar figurative language which will be analyzed in this study are some types including hyperbole, simile, and metaphor. I found 4 hyperbole, 16 simile and 6 metaphor in the speech. In ideology, I use three levels of discourse structure by Van Dijk, such as macrostructure, superstructure, and microstructure. In macrostructure, there is an element called thematic. In this speech, I

found 7 thematic. In superstructure, there is an element called schema. In analyzing the schema, I use the entire script and divided it into 8 parts based on the speakers. In microstructure, there are several elements such as: semantic, syntactic, stylistic and rhetorical elements.
