APPENDIX 1 SCHEME OF THE RESEARCH

APPENDIX 2

POSTER OF THE RESEARCH

Denotative and Connotative Meaning in 'Doctor Sleep' (2019) Movie Script by Mike Flanagan

Background of the Problem

Semantics is study of the meanings of words and phrases. Leech divides meaning into seven, they are called seven types of meanings, there are conceptual meaning (denotative), connotative meaning, social meaning, affective meaning, reflective meaning, collocative meaning, and the last is thematic meaning. Connotation and denotation are not two separate signs. They are two elements of sign, and the connotative meanings of a word exist together with the denotative meanings. 'Doctor Sleep' movie tells about people and children who have a gift called 'shining'. The reason why I choose Doctor Sleep movie as the research object is because Doctor Sleep is a unique film, its genre is supernatural horror film which means combines aspects of horror film and supernatural film.

Objectives of the Research

- To find out a connotative meaning of conversation that cannot be translated literally in 'Doctor Sleep' movie script.
- 2. To identify types of connotative meaning found in 'Doctor Sleep' movie script.
- 3. To define why some conversation in 'Doctor Sleep' movie script cannot be translated literally.

Research Method

A qualitative approach is used in this research because it aimed to find denotative and connotative meaning in 'Doctor Sleep' movie script, there are some utterances that cannot be translated literally. I used a qualitative descriptive analysis method in this research because I collect the data and analyzed it, and then interpret the utterances that cannot be translated literally. The data and information that have been obtained are taken for the meaning, presented in descriptive analytic and generally without using numbers.

Conclusion

Language that used by human beings as communication tools could indicates certain meaning that cannot be translated literally. Semantics is the study of word meaning and sentence meaning, it is an attempt to understand about meaning in language. This research used denotative and connotative meaning to interpret and understand the utterances that cannot be translated literally in 'Doctor Sleep' (2019) movie script by Mike Flanagan. There are different kinds of connotative meaning in 'Doctor Sleep' movie script, namely positive, negative, and neutral connotative meaning. In this research, the dominant type of connotative meaning in the script is neutral

> Tiara Viga Saphira 2018130115 Strata One (S-1) English Language and Culture Darma Persada University

Research Finding

This research is conducted to find and explain connotative meaning behind utterances and explain why it cannot translate literally, and also to classify what type of connotative meaning is in every utterances. I found some utterance that contains words, phrases and sentences that contains the denotative and connotative meaning in 'Doctor Sleep' movie script by Mike Flanagan.

Formulation of the Problem

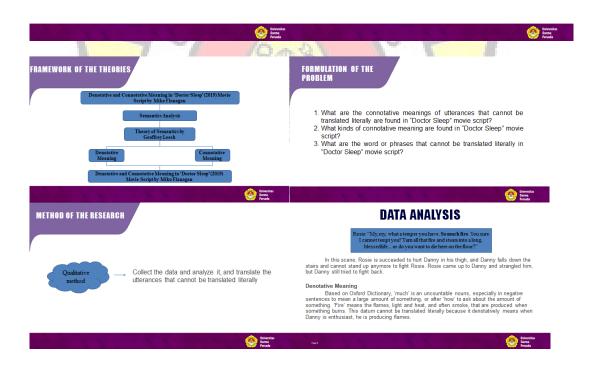

- 1. What is the connotative meaning of utterances that cannot be translated literally in 'Doctor Sleep' movie script?
- 2. What kinds of connotative meaning are found in 'Doctor Sleep' movie script?
- 3. Why cannot some utterances in 'Doctor Sleep' movie script be translated literally?

APPENDIX 3

PRESENTATION SLIDE

DATA ANALYSIS

Connotative Meaning

The connotative meaning of "so much fire" is full of spirit and strength. I include this datum as a positive connotative meaning because he still being able to fight back despite being suffocated by Rosie's unusual strength. He still wants to fight Rosie to protect Abra because he knows Rosie is chasing after Abra.

CONCLUSION

- The connotative meaning found in this film script shows the conflict between the shining people and the evil cult True Knot.
- First, I found 16 data with neutral connotative meanings. The second is negative meanings with 13 data, and the last is positive meanings with six data.

- Most of the data I found could not possibly happen in real life, so it could not be translated literally.
- The researcher expected to understand the denotative and connotative meaning well. Denotative and connotative meanings usually have a linking meaning, and it will help to understand the connotative meanings even more.
