

CHAPTER 4

A SEMIOTIC ANALYSIS OF THE AVENGERS SIX INFINITY STONES

4.1 Relationship Between Agate Stone and All the 6 Infinity Stones

The data were studied in this chapter using Peirce's Triadic model, which includes representamen, object, and interpretant. Data analysis is the act of examining each component of the data presented using analytical and logical reasoning. When performing research, this type of analysis is simply one of the many processes that must be completed. Data from the source is obtained, evaluated, and examined to arrive at some type of conclusion or result. This preface the writer found that the data itself comes from elements. The elements divide into verbal and visual signs. And in this section there 6 stone symbols that have a verbal signs and visual signs.

4.1.1 An Analysis of 6 Elements symbol in infinity stones

The elements in this infinity gauntlet are the six infinity stones that the writer will analyze and the sign is divided into a visual signs and verbal signs. In this section, I will analyze all the six infinity stones from the background where the stone was created and where the stone was found so it will be a detailed explanation and I will connect it to a real-life stone that exists as a reference of making this infinity stones in Marvel Universe.

Picture 4.1 Infinity Gauntlet & Infinity Stones Logo

In this research, the writer sees the infinity gauntlet and the infinity stones in it, and the writer found the three visual signs in the six Infinity Stones logo. The writer discovered three signs: representamen, object, and interpretant, according to elements. Peirce's triadic semiosis was used to assess the data. But before we analyze the writer have to explain all the 6 infinity stones background and connect it with the analysis.

4.1.2 An Analysis of Visual Sign and Explanation in “Space Stone” Logo

In this section, the writer will explain the background story to know what is the space stone means and this will be connected to the visual sign analysis that will be added after the explanation and the writer using Charles Sanders Peirce’s Triadic Model

Picture 4.2 The Space Stone

The writer will explain the ability that the infinity stones have and the writer will elaborate on the history of all the six stones so the reader can deeply know about what the writer is analyzing it for, and the writer will give A little film overview to explain that these six stones exist and play an important role in the Avengers movie.

4.1.2.1 The Space Stone Ability

The space stone allows the user to manipulate space in such a manner that they can teleport throughout the cosmos. Even in parallel universes, It's also possible to make wormholes and alter gravity. Regardless of the physical laws. The stone first appeared in the film Captain America: The First Avenger, precisely in the Tesseract, at that time its power was taken to make weapons of war for the Hydra troops.

4.1.2.2 The Space Stone History

Johann Schmidt / Red Skull utilized the Space Stone in 1942 to construct weapons of mass devastation and restore the Third Reich, which was experiencing defeat after defeat at the time. Captain America was able to defeat it, but only at a severe cost, as he was forced to freeze for years on the frozen Arctic seabed. The stone was later discovered by Howard Stark for investigation before being utilized by researchers Mar-Vell in Project P.E.G.A.S.U.S. Carol Danvers became Captain Marvel as a result of the stone, to cut a long tale short.

4.1.2.3 Genesis Film Story in Avengers Endgame About Space Stone

When Loki invades Earth with all his might in 2012, Iron Man and Ant-Man return to New York City. Tony Stark / Iron Man sent the Space Stone (Tesseract) to S.H.I.E.L.D. in 2012 to give it over. In 2012, Ant-Man snuck inside Tony's body to cause him to die for a brief moment. When Tony in the future intends to seize him, the Hulk of 2012 unexpectedly attacks him, allowing Loki to use him to escape, and the mission fails. Iron Man and Captain America had to travel back to 1970 to obtain the Space Stone and the Pym Particles liquid.

4.1.2.4 Visual Sign of The Space Stone

The visual sign in this space stone symbols have three Triadic semiotic in *real life* stone and they can be seen as follows:

No	Representamen	Object	Interpretant	Real life	Film
1	Spiritus Stone	Light Blue-Sky Colour	This stone in real life gives the meaning that the blue color gives freshness to the wearer as if the person is in a calm and cool place that can manipulate the room just like the movie who can manipulate space or vibes		
2	Space Stone	DaBlue Sky	This Stone in the film has a big impact on the universe and allows the user to manipulate space in such a manner that they can teleport throughout the cosmos. Even in parallel universes, it's also possible to make wormholes and alter gravity		

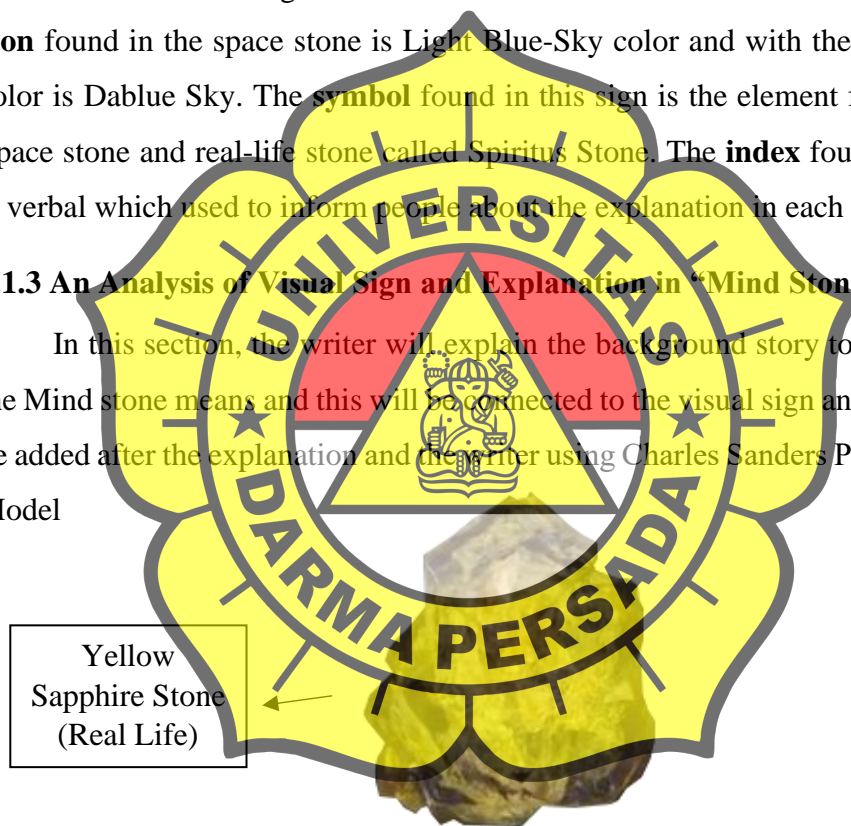

Table 4.1 Visual Sign analysis in Infinity Stone (Space Stone) Logo.

In this Space Stone analysis, the writer finds the base on the representamen, and according to Peirce signs is divided into three, they called Qualisign, Sinsign, and Legisign. The **Qualisign** (Quality of Sign) found the data that the Space Stone Color is a Blue-Sky color. The **SinSign** (Actual of Sign) found the data that the Space Stone is taking the reference from a real-life stone called “Spirtus Stone”. The **Legisign** (Law of Sign) finds the meaning and the identity of the space stone logo shown by A blue sky color and a real-life reference from Spirtus Stone.

Based on its object, Peirce divides signs into three, called icon, index and symbol. The icon is a sign that has a resemblance with the fact that it refers to. The **icon** found in the space stone is Light Blue-Sky color and with the real stone the color is Dablue Sky. The **symbol** found in this sign is the element from the stone Space stone and real-life stone called Spiritus Stone. The **index** found in this sign is verbal which used to inform people about the explanation in each two Stones.

4.1.3 An Analysis of Visual Sign and Explanation in “Mind Stone” Logo”

In this section, the writer will explain the background story to know what is the Mind stone means and this will be connected to the visual sign analysis that will be added after the explanation and the writer using Charles Sanders Peirce’s Triadic Model

Picture 4.3 The Mind Stone

The writer will explain the ability that the infinity stones have and the writer will about the history of all the six stones so the reader can deeply know about what the writer is analyzing it for, and the writer will give A little film overview to explain that these six stones exist and play an important role in the Avengers movie.

4.1.3.1 The Mind Stone Ability

The Mind Stone enables the user to exert power over other people's thoughts. In 2012's *The Avengers*, we first glimpse it as a blue ball in Loki's sceptre. Loki has complete power over whomever he touches with the sceptre. Thanos bestows the Mind Stone on Loki, putting a lot of trust in the villain, who is amusing but not terribly accomplished. At the start of *Avengers: Age of Ultron*, the Avengers reclaim Loki's sceptre. The Mind Stone is used by Tony Stark (Robert Downey Jr.) and Bruce Banner (Mark Ruffalo) to construct Ultron (James Spader), an artificially intelligent peacekeeper. Those two must not have read *Frankenstein* since they are taken aback when Ultron turns on them. The Avengers finally utilize the Mind Stone to build another android, Vision, after some squabbling (Paul Bettany). Vision gains a variety of abilities from the stone, including superhuman strength, the capacity to fly, and the ability to pass through walls and people like a ghost. Surprisingly, it does not grant him the capacity to manipulate people's thoughts. The Avengers swear to defend Vision, who carries the Mind Stone on his forehead. Scarlet Witch (Elizabeth Olsen) smashes the stone after Thanos' army overtakes Earth's Mightiest Heroes, killing Vision in the process. Thanos (who already possesses the Time Stone) easily turns back the clock, kills Vision, and takes the stone for himself.

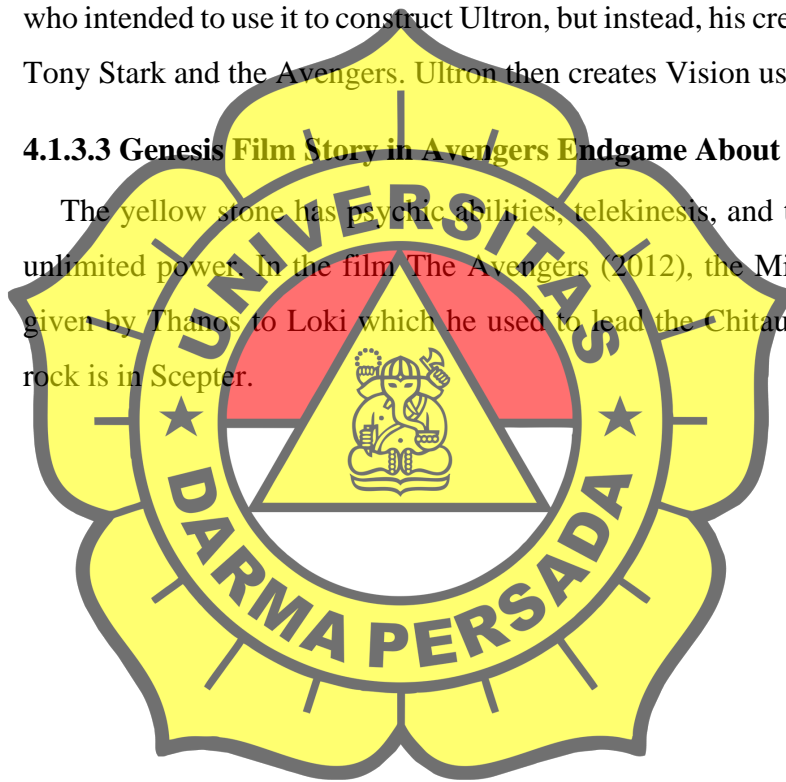

4.1.3.2 The Mind Stone History

The Mind Stone is known as the Chitauri Scepter. This yellow stone can increase the user's mentality, such as the power to subdue other people's thoughts, control the opponent's mind, telepathy, and telekinesis. Not only that, but this stone can also increase the intelligence of its users, you know. First appearing in *The Avengers*, this Power Stone is stored in Loki's wand, which was a gift from Thanos. That power is what Loki uses to help Thanos steal the Tesseract so that the Avengers are divided. But in the end, the Avengers managed to defeat Loki and take this stone. Not until there, the Mind Stone also played a role in the film *Avengers: Age of Ultron*. This stone is arguably the life and source of strength for Vision, a

character created by Tony Stark and Bruce Banner. Until now, the Mind Stone is still attached to Vision's forehead, before being snatched away by Thanos in Avengers: Infinity War. Thanos delivered this Mind Stone to Loki and his mercenaries for them to assault the Earth. Loki's invasion was thwarted in The Avengers film because Iron Man, Captain America, Hulk, Thor, Black Widow, and Hawkeye plotted to stop it. Later, S.H.I.E.L.D. acquired this stone. S.H.I.E.L.D. was unexpectedly invaded by HYDRA, who created Pietro/Quicksilver and Wanda Maximoff/Scarlett Witch. During Avengers: Age of Ultron, this stone was in the hands of Tony Stark, who intended to use it to construct Ultron, but instead, his creation attacked Tony Stark and the Avengers. Ultron then creates Vision using this stone.

4.1.3.3 Genesis Film Story in Avengers Endgame About Mind Stone

The yellow stone has psychic abilities, telekinesis, and telepathy with unlimited power. In the film The Avengers (2012), the Mind Stone was given by Thanos to Loki which he used to lead the Chitauri troops. The rock is in Scepter.

4.1.3.4 Visual Sign the Mind Stone

2	Mind Stone	Golden Beryl	The Mind Stone user powers of telepathy, Telekinesis. High intelligence, dream manipulation, and mind control. The stone is even able to create sentience in artificial beings, as shown with vision in the MCU. When combined with all other stones, the user can manipulate all minds across the entire Universe.		

Table 4.2 Visual Sign analysis in Infinity Stone (Mind Stone) Logo

In this Mind Stone analysis, the writer finds the base on the representamen, and according to Pierce signs are divided into three, they called Qualisign, Sinsign, and Legisign. The Qualisign (Quality of Sign) found the data that the Space Stone Color is a Yellow Sapphire color. The SinSign (Actual of Sign) found the data that the Mind Stone is taking the reference from a real-life stone called “Yellow Sapphire Stone”. The Legisign (Law of Sign) find the meaning and the identity about the Mind stone logo showed by A Yellow Sapphire color and a real-life reference from Yellow Sapphire Stone and it is believed to the wearer that people will like you if you wear this stone.

Based on its object, Peirce divides signs into three, called an icon, index, and symbol. The **Icon** is a sign that has a resemblance with the fact that it refers to. The icon found in the Mind stone is Yellow Sapphire colour and with the real stone, the colour is Golden Beryl colour. The symbol found in this sign is the element from the stone Mind stone and real-life stone called Yellow Sapphire Stone. The **index** was found in this sign is verbal which is used to inform people about the explanation in each two Stones.

4.1.4 An Analysis of Visual Sign and Explanation in “Reality Stone” Logo”

In this section, the writer will explain the background story to know what The Reality Stone means and this will be connected to the visual sign analysis that will be added after the explanation and the writer using Charles Sanders Pierce’s Triadic Model

Picture 4.4 The Reality Stone

The writer will explain the ability that the infinity stones have and the writer will tell you about the history of all the six stones so the reader can deeply know about what the writer is analyzing it for, and the writer will give A little film overview to explain that these six stones exist and play an important role in the Avengers movie.

4.1.4.1 The Reality Stone Ability

The user of the Reality Stone gains the ability to alter matter. Because he's malevolent, Malekith (Christopher Eccleston) in Thor: The Black World intends to utilize this crimson liquid substance called Aether to transform matter into the dark matter... Is there any other reason you need? The Aether, it turns out, is a manifestation of the Reality Stone. Two Asgardians surrender the Reality Stone to The Collector at the end of the film because they can't store the Space Stone and the Reality Stone in the same chamber in Asgard. This appears to be a big oversight: as soon as they depart, the Collector exclaims, "One down, five to go." It's uncertain if the Collector instantly handed the stone over to Thanos or if Thanos murdered Del Toro's character. Thanos announces that he has beaten the Guardians of the Galaxy to the Reality Stone as they arrive to collect it from the Collector. Gamora is then kidnapped by him.

4.1.4.2 The Reality Stones History

The leader of the Dark Elves from Svartalfheim, Malekith, uses the Reality Stone to create a weapon that creates Aether. Malekith planned to release the Aether so that the nine realms became eternal shadows, but the people of Asgard intervened so that the plan failed. In 2013, a portal to the Aether opened, Jane Foster accidentally entered there causing the Reality Stone to be infected.

4.1.4.3 Genesis Film Story in Avengers Endgame About Reality Stone

Thor and Rocket are two superheroes. When Raccoon returned to Asgard in 2013, Thor was caught red-handed by his mother, Frigga, who was still alive at the time, thus only Rocket was able to complete the

The Power Stone was delivered to Xandar's Nova Corps after Ronan was vanquished by the Guardians of the Galaxy. In Infinity War, Thanos apprehended them off-screen and used the stone's power to bring a whole planet crashing down on Iron Man and his allies.

The stone was then taken by Nebula in a temple, injuring her cybernetic hand. Because he is a robot, however, making the previous Nebula in 2023 interferes with his intentions and thoughts, allowing Thanos to time travel to 2023 in 2014. 4.1.7 An Analysis of Visual Sign and Explanation in “The Soul Stone”

To explain what the Power Stone means, the writer will describe a backstory in this section, which will be related to the visual sign analysis that will be presented after the explanation, using Charles Sanders Peirce’s Triadic Model.

Picture 4.6 The Soul Stone

The writer will discuss the abilities of the infinity stones, as well as the history of each of the six stones so that the reader has a thorough understanding of what the

writer is analyzing. Finally, the writer will provide a brief film overview to explain that these six stones exist and play an important role in the Avengers movie.

4.1.7.1 The Soul Stone Ability

The deadliest stone of all, its wielder can control and manipulate humans as well as the souls of the dead. If this stone is maximized, it can govern all living beings in the cosmos.

4.1.7.2 The Soul Stones History

Few people are aware of this stone; the Asgardians and Thor himself claim that no one has ever heard of it or seen it. Until Thanos discovered him in Vormir, guarded by the Red Skull, who had been infected by the Space Stone, and cursed him to protect the Soul Stone until it was taken. Thanos then sacrificed Gamora, his stepson, to get the Soul Stone.

4.1.7.3 Genesis Film Story in Avengers Endgame About Soul Stone

Hawkeye and Black Widow return to the planet Vormir in the year 2014. They were taken back when one of them had to give his life to obtain the Soul Stone, "soul for a soul." Until Black Widow "succeeded" to give up his life after a fight that made the spectators hold their breath. Black Widow (Scarlett Johansson) and Hawkeye (Jeremy Renner) are in very comparable situations in Endgame. Due to a development in time travel, they also visit Vormir years before Thanos' tragic excursion there. The only thing Black Widow and Hawkeye are certain of is that they must the Soul Stone in order to have a shot at undoing Thanos' murderous deed on Vormir. They encounter the same predicament Thanos did when they arrive on Vormir. One of them must let go of a special someone. They both must pass away. There aren't any other options or second chances. Hawkeye and Black Widow offer their services as the sacrificed lambs rather than using the straw or giving up.

Table 4.6 Visual Sign analysis in Infinity Stone (Soul Stone) Logo

In this Soul Stone analysis, the writer finds the base on the representamen, and according to Peirce signs are divided into three, they called Qualisign, Sinsign, and Legisign. The Qualisign (Quality of Sign) found the data that the Soul Stone Color is an orange color. The SinSign (Actual of Sign) found the data that the Soul Stone is taking the reference from a real-life stone called “Sulaiman Madu”. The Legisign (Law of Sign) find the meaning and the identity of The Time stone logo showed by An Orange colour and a real-life reference from Sulaiman Madu Stone is inspired by Sulaiman Madu stone, the stone is linked to the account of Prophet Sulaiman, who rose to power not only in human life but also in the lives of jinn and animals, manipulating the soul in this way.

Based on its object, Peirce divides signs into three, called an icon, index, and symbol. The **Icon** is a sign that has a resemblance with the fact that it refers to. The icon found in the Soul stone is Citrine color and with the real stone, the color is an Orange color. The **symbol** found in this sign is the element from the stone Soul stone and real-life stone called Sulaiman Madu Stone. The **index** found in this sign is verbal which is used to inform people about the explanation in each two Stones.

4.2 Connection Between Agate Stone and The 6 Infinity Stones in Real Life

The Connection of each Infinity Stone and agate stone not only symbolizes but also governs, a different component of the Marvel Universe. Because the Reality Stone deals with the fundamental structure of matter, I prefer to refer to it as the Matter Stone. The Power Stone, which I like to call the Energy Stone, has to do with the quantum realm's nearly boundless energy. The Space and Time Stones are concerned with the very fabric of space-time. The Mind and Soul Stones, which deal with the mind and spirit of the sentient human who lives in this Universe, are the most mystical.

The Stones not only symbolize but also control some parts of our life, the issue naturally arises. the Stones' being has a fail-safe that assures that some tiny or perhaps subatomic portion of a Stone will be left, sufficient to at least stabilize that element of reality that it regulates. This would explain why people continued to think after the Mind Stone was shattered, and why the main MCU chronology continued to exist after Thanos destroyed the Infinity Stones.

The elements of sign found in the six infinity stones are the visual signs. Each symbol contains a variety of color (Blue, Yellow, Red, Purple, Green, Orange) to represent the identity of the Symbol Which came from the variety of the Infinity Stones. The Pierce Theory used triadic theory to define the relation between the representamen, the object, and the interpretant. The representamen which has been found in this research are: Qualisign which is based on the quality of background color in the six Infinity stones which in this section are blue, yellow, red, purple, green, and orange. Sinsign that is found in the logo shows the actual symbol, which is inspired by agate stone. The connectivity with agate stones in this case refer to the real meaning and efficacy with the real agate stones and legisign is the law or fact which is found in the data that the writer found as follows:

No	Infinity Stones	Agate Stones	Connection
1	Space Stone (Manipulating Space)	 (Source: Tokopedia)	The two space stones and the Spirit stone have something in common, namely, they can manipulate the surrounding environment for the wearer of these two stones
2	Mind Stone (Mind Control)	Yellow Sapphire Stone (Make people attracted to you)	Both Mind stone and yellow sapphire stone have something in common, namely,

		 <p>(Source: gemrockauctions)</p>	they can manipulate the environment for the wearer of these two stones
3	Reality Stone (Reality Changer)	Ruby Red Mustika Stone (Make someone fall in love)	Both Reality Stones and Ruby Red Mustika Stones have something in common, namely, they can change circumstances and take control of the surroundings for the wearer of these two stones
4	Power Stone (Enhanced Power)	Kecebung Amethyst Stone (Increase Valour and Strength)	The two Power Stones and the Amethyst Stones have one thing in common, they both increase the strength of the wearer of these two stones
5	Time Stone	Bacan Doko Stone (The older stone becomes, the more beautiful it becomes)	Both the Time Stone and Bacan Doko Stone have

	(Control Time and reverse aging)	 <p>(Source: shopee)</p>	something in common, namely, they can manipulate time for the wearer of these two stones
6	Soul Stone (Manipulate life and Death Souls)	Sulaiman Madu Stone (Lingked to Prophet Sulaiman who rose to power not only in human life but also in the lives)  <p>(Source: maxmanroe)</p>	The two Soul Stones and Solomon Madu Stones have something in common, namely they can awaken the soul for the wearer of these two stones

Utilizing the triadic technique, which consists of three components: the referent, the object, and the signifier and interpreter of the sign. The Space Stone, Mind Stone, Reality Stone, Power Stone, Time Stone, and Soul Stone are among the six Infinity Stones that the book can use to demonstrate similarities between them. This Agate is very similar in terms of each of its strengths and beliefs, which are indeed similar to those of the other Infinity Stones. These Infinity Stones indeed resemble Indonesian religious traditions.

CHAPTER 5

5.1 Conclusion

From this research, it can be concluded that the infinity stones in the Marvel MCU film adapt natural stones that exist in the world. This can be shown from the similarities in the use of Infinity Stones and the similarity in the aspect of color in the film with the properties of natural stones that are believed by the culture of the people.
