

CHAPTER V

CONCLUSION

The analysis that I do is only based on the overall lyrics in the song, I limit my analysis only to the song, that's the reason why I choose words from the lexical meaning in my analysis. For example: Warrior = Armor (Synonym) I analysis this word as a synonym in this song because these two words are suitable synonyms after analyzing all the lyrics in one song. This is the only word I find as a synonym that I find in the song. After analyzing, I found that we can express ourselves through music. Not only in the direct words spoken, but we can also through the signal that writing or listening to songs. Many songs can express a mood. Many songs can match our mood, not only when we are happy when we are sad, and even when we are down, some songs can represent our hearts. I also learned that different understandings can make the theme of the song different depending on the perspective of each.

In seven songs Demi Lovato had a different title, a different context, and a different theme too. This statement indicates that the theme revealed in Demi Lovato's seven songs is various. The theme: motivation, enthusiasm, risk of falling in love, romantic love song, and power. These themes can be expressed through lexical and contextual meaning contained in the song. In lexical meaning, some are significant lexeme and their lexical meaning and lexical category are found. It considers a keyword in analyzing the content of the song. Lexical categories found in the six selected songs are synonym, antonym, hyponym, and homonym.

Not only lexical meaning, but I also find that there are several contextual meanings. Among them is the context of the situation, the context of the goal, the mood of the listener or singer, and also the context of time. The meaning of context is very important to understand so that we can follow the path directed by the singer, which can describe how we feel when listening to the song. When we can follow the context contained in the song, the brain will automatically follow

the flow of the song and we can be carried away by the mood of the song even though the feelings we are feeling are different from those in the song.

After analyzing I found out that Demi Lovato wrote songs with different themes on one album. In the song titled "Heart Attack," Demi talks about how scared Demi is to fall in love and make her have a heart attack or when someone is in a situation where they have been hurt several times, and in other situations where they feel left out and when someone opens their heart. and ready to fall in love again, then that person must accept the risk of getting hurt. And this song is about taking that risk.

The second song "Never Been Hurt" tells about a woman who always struggles to be with her lover even though she is often injured and there is no hope to be together, she always tries anything to be able to stay together as she has never felt hurt by that man. The third song "Warrior" tells about a woman who rises from adversity and insults people, then returns as a stronger person. The fourth song entitled "Something that we're not" tells the story of a broken friendship because the man treats and introduces Demi to his friends as a lover, this makes Demi feel annoyed and she tries to stay away from her friend because she is uncomfortable with his treatment. The fifth song "In Case" tells about a couple who separated, but the woman still hopes that her ex will return and she will happily welcome him back. The sixth song "Neon Light" tells about a lover who doubts her relationship, and feels that there is a problem in her heart that cannot be expressed. The seventh song is "Made in USA" tells about a couple who love each other saying their relationship is very strong even though the distance separates them because they were made in the USA (like things that are made very strong and durable).
