APPENDIX 2

POSTER OF THE RESEARCH

THE ANALYSIS OF GRAMMATICAL ERRORS FOUND IN THE MOVIE'S SCRIPT OF BAD BOYS FOR LIFE (2020)

BACKGROUND

Learning a language is important. We can learn the language from variety of sources, one of which is movie. Movie is a fun source to learn for example Bad Boys for Life movie

Bad Boys for Life is a film about two detectives investigating related to Mike's past as the main character in this film. There are many speeches that do not match the Grammatical Error contained in this script and I am interested in analyzing the Grammar Error. The error occurred in the words of Mike, Marcus and other characters. I chose this film because the language used in this film tends to be modern and often used by young people.

BENEFITS

I hope that the results of this study are are useful in language development research, especially in the grammar aspect. I also hope that the results of this study can be a proper improvement for those who want to expand research about Grammatical Error in utterances. This research is hopefully available to be reference for further research with the same topic but different research object, for example different movie or different script.

METHOD

In this research, I use Descriptive Qualitative Method to analyze the grammatical errors of some sentences from Bad Boys for Life movie script.

I choose Descriptive Qualitative because the purpose of this study is to describe the analysis of Grammatical Errors of some sentences based on the theory of Dulay, Burt, and Krashen.

RESEARCH FINDINGS

This research can give us something that we can learn in our lives. For example learning language from movie script. We also know some theories about grammar and types of grammatical error. I use theory from Dulay, Burt and Krashen. The primary data of this research is Movie's script of Bad Boys for Life

CONCLUSION

The result of the total of error-analysis shows that there are 69 errors. Which include 51 or 77,2 % errors of Omission, 16 or 24,2% errors of Misformation , and 2 or 3,03% errors of Misordering . From these results, it can be seen that the tendency for the most errors is in the Omission error. This Omission error resulted from 24 sentences by Mike, 19 sentences by Marcus, and 8 sentences by other characters

BACKGROUND OF THE PROBLEM

Learning a language is important. We can learn the language from variety of sources, one of which is movie. Film provides us with examples of the use of English in real contexts in every utterance in the movie. In spite of that There are some utterances uttered by the character that do not follow the English grammatical rules. For example, from *Bad Boys for Life* movie script, the utterance **Hey, even the Batmobile don't hold the road like this bitch** contains grammatical error because the subject Batmobile does not match with negative verb **don't**. This is an example of an expression that does not comply with the grammar rules. This is usually called grammatical error. I chose this film because the language used in this film tends to be modern and often used by young people.

IDENTIFICATION OF THE PROBLEM

Grammatical errors that appear in movie's script can have potential "danger" for English language learners and non English native speaker.

FORMULATION OF THE PROBLEM

I only focus on my research on the errors in the sentences or utterances uttered by Mike and Marcus as the main characters in the film. I also focus on the errors in the sentence or utterances uttered by other characters. In addition, I also limit the analysis of Grammatical Errors based on the classification of errors expressed by Dulay, Burt, and Krashen (1982).

FRAMEWORK OF THE THEORIES

```
Theory of      →   Theory of error   →   Theory of         →   Classification of
grammar                                   grammatical           grammatical error
                                          error                 based on Dulay, Burt
                                                                and Krashen's theory
                                                                        ↓
Theory of      ←   Theory of         ←   Theory of         ←   Theory of
morpheme           sentence              utterance             utterance
    ↓
Theory of
movie script

Research
Finding
and Analysis

DATA ANALYSIS

Sentences Containing Errors	Analysis/Discussion	Types of Error
Hey, even the Batmobile don't hold the road like this bitch.	In this sentence, word 'don't' is not correct. 'Don't' should be 'doesn't' because the subject is 'batmobile' which is singular.	Misformation

Sentences	Analysis/discussion	Types of Error
How long you been married?	This sentence is not correct because missing of word 'have should be placed before 'you'	Omission

Sentences	Analysis/discussion	Types of Error
You're saying that you actually outran me?	This sentence is not correct because misplacement of the word 'are' should be placed before 'you'.	Misordering

CONCLUSION

1 **Errors spoken by Mike**

Analysis of sentence errors spoken by Mike shows that there are 32 sentences that contain errors. Of the 32 sentences containing the error are classified into errors of Omission 24 sentences, errors of Misformation 6 sentence and errors of Misordering 2 sentences (none of the errors from Addition).

2 **Errors spoken by Marcus**

Analysis of sentence errors spoken by Marcus shows that there are 26 sentences that contain errors. Of the 26 sentences containing the error are classified into errors of Omission 19 sentences and errors of Misformation 7 sentence (none of the errors from Addition and Misordering).

CONCLUSION

3 **Errors spoken by other characters**

Analysis of sentence errors spoken by other characters shows that there are 11 sentences that contain errors. Of the 11 sentences containing the error are classified into errors of Omission 8 sentences and errors of Misformation 3 sentence (none of the errors from Addition and Misordering).

4 **Total of errors**

The total errors pronounced by Mike, Marcus and other characters amounted to 51 or 77,2% errors of omission, 16 or 24,2% errors of Misformation and 2 or 3,03% errors of Misordering.
