

BAB V

KESIMPULAN

Dari hasil Perancangan dan percobaan sistem jarak jauh melalui Personal Komputer, dapat disimpulkan beberapa hal sebagai berikut:

1. Personal Komputer (PC) tidak hanya dapat dipakai untuk mengolah kata dan sebagai data base saja, tetapi dapat pula dipakai untuk penerapan lainnya yang berhubungan dengan dunia luar yaitu sebagai sarana untuk mengendalikan suatu alat dari jarak jauh.
2. Pemanfaatan Card Printer Adapter yang merupakan standar pada IBM PC, dapat berhubungan dengan sistem di luar tanpa harus membuat suatu Card khusus.
3. Peralatan yang dirancang ini, memungkinkan pemakaian dalam bentuk lain apabila penggunaannya masih berupa sistem ON/OFF.
4. Keterbatasan yang ada pada rangkaian penerima (Mobil remote kontrol) menyebabkan terbatasnya gerak motor (Dinamo) pada mobil.
5. Keterbatasan jarak pancar remote kontrol menyebabkan pengendalian pada rangkaian penerima (mobil remote kontrol) juga terbatas.
