

CHAPTER V

CONCLUSION

5.1 Conclusion

The following are some conclusions drawn by the researcher in light of the research findings:

This investigation turned up multiple instances of polysemy used by characters in the script for the 2022 film *The Batman*. There are 45 polysemy words in this movie script, according to the findings and discussion.

This investigation conclude that polysemy plays a crucial role in the linguistic and narrative construction of "*The Batman*" (2022) movie script. By systematically categorizing and analyzing the polysemous words, the research highlights the complexity of language use in film and its impact on viewers' interpretation. This study not only enriches the understanding of polysemy in media but also sets a foundation for future linguistic research in similar domains.

The researcher comes to the conclusion that the meanings of the polysemy words in this movie script are not the same as their actual meanings based on the context. The characters in this film utilize polysemy words as parables to make their dialogue engaging and understandable.

5.2 Suggestion

In light of the preceding conclusion, the following recommendations are made regarding this research:

1. For Lecturer This study could help to improve student's grammar especially about pronoun. By using the results as a guide to comprehend the study's content, English teachers were able to benefit from this research. Additionally, the researcher recommended reading more polysemy-related literature with theories that are more thorough. The researcher also wanted the polysemy in the speech to be understood by others. If polysemy's types are distinguished, using it in any kind of media may also be easier.

2. For Student By studying deixis could give students more benefits and thoughtful in referring speaker meaning. Students should study semantics, particularly with regard to polysemous words and their varieties, as this will improve their understanding of these word types.

3. Next Researcher, the next research about deixis is more specific one and the next researcher can use this study as referent. In order to aid students in their study of semantics, other researchers should carry out detailed analyses of polysemous words and the various kinds of polysemous words.

4. It is suggested that readers, including researchers studying polysemy, make use of additional sources of information, such as speeches, novels, poems, short stories, and so forth. The goal of this is to discover fresh results that other researchers can use as additional references and as a point of comparison. Furthermore, scholars can establish links between the concept of polysemy and other fields of study like language, pragmatics, sociology, and others. It is hoped that future researchers interested in polysemy analysis will be able to offer a more thorough explanation that will aid in comprehending the idea of polysemy in a sentence or utterance. Semantics is a subject that students should study because it will help them better understand polysemous words and their varieties.
